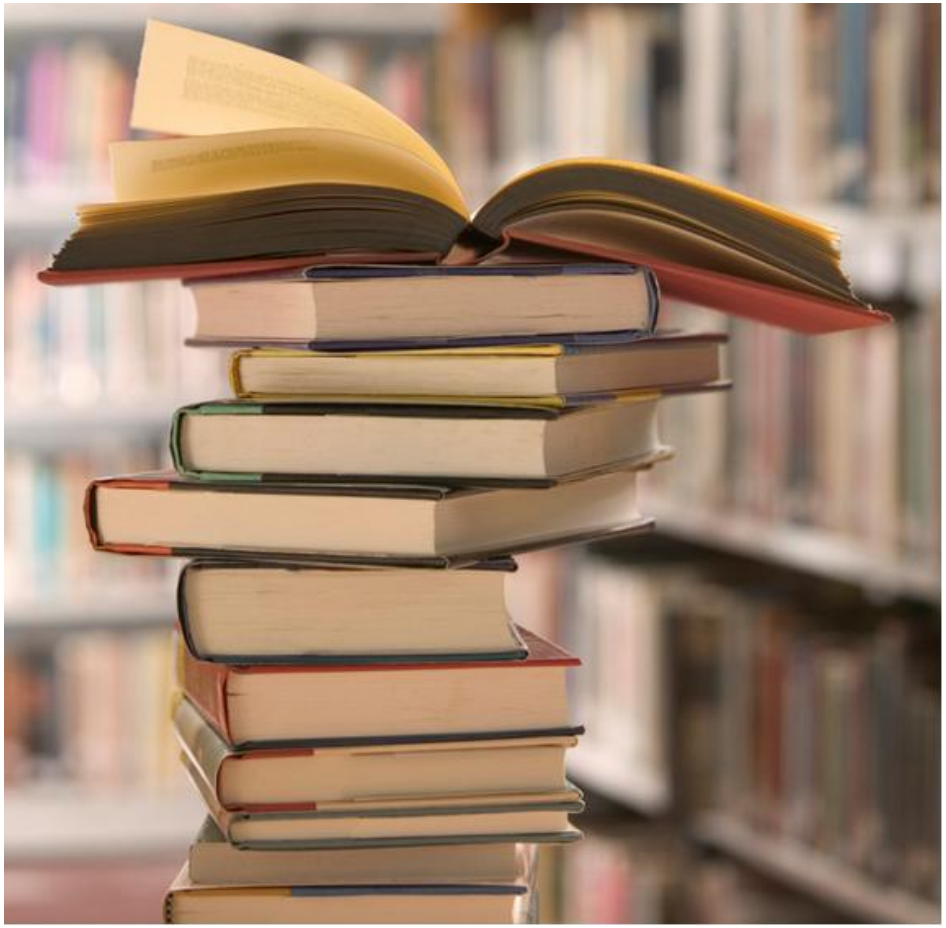
CODING
BLOCKS

Linked List doubts?

Recursion and Pile of Books



CODING BLOCKS

Stacks

Stacks

```
class Stack{
    // accessor methods
    int size();
    bool isEmpty();
    int top();
    // update methods
    void push (int element);
    int pop();
}
```

How to implement Stack Class?

1. Arrays
2. Linked List

Dynamic Arrays

Lets Implement Our Own Stack Class Using a Dynamic Array

Your Turn: Implement Stack Class Using Linked List

Lets solve few problems

1. Given an expression check if brackets are balanced e.g. { a + [b+ (c + d)] + (e + f) }
2. Reverse a Stack with the help of another empty stack

Queues

Queue

```
class Queue{
    // accessor methods
    int size();
    bool isEmpty();
    int front();
    // update methods
    void enqueue(int element);
     int dequeue();
}
```

How to implement Queue Class?

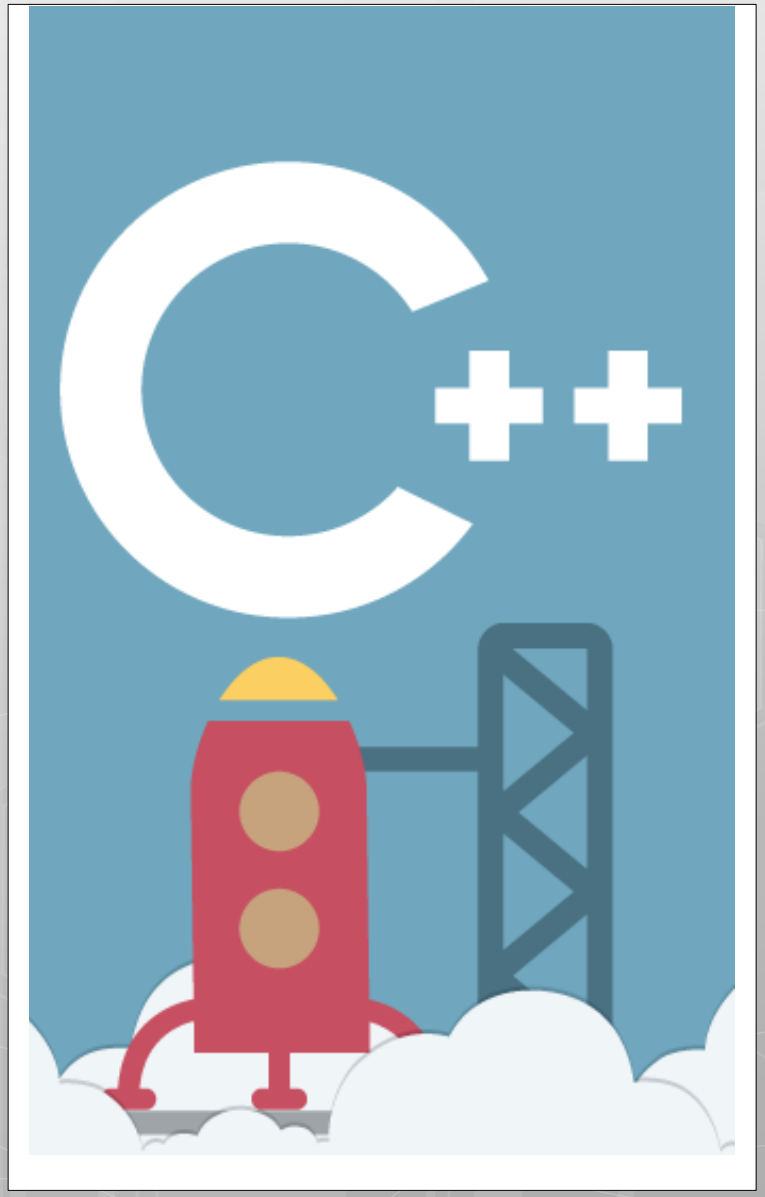
1. Linked List
2. Arrays

Lets Implement Our Own Queue Class Using Arrays

Your Turn: Implement Queue Class Using Linked List

Lets solve few problems

1. Reverse a Queue
2. Implement a Stack using Two Queues



Thank You!
