Any doubts?

Time to try?

- Binary Search
- Merge two sorted arrays into a third array
- Given an array and a number x . Find pairs of array elements which sum to x .

Character Arrays

Lets write some code

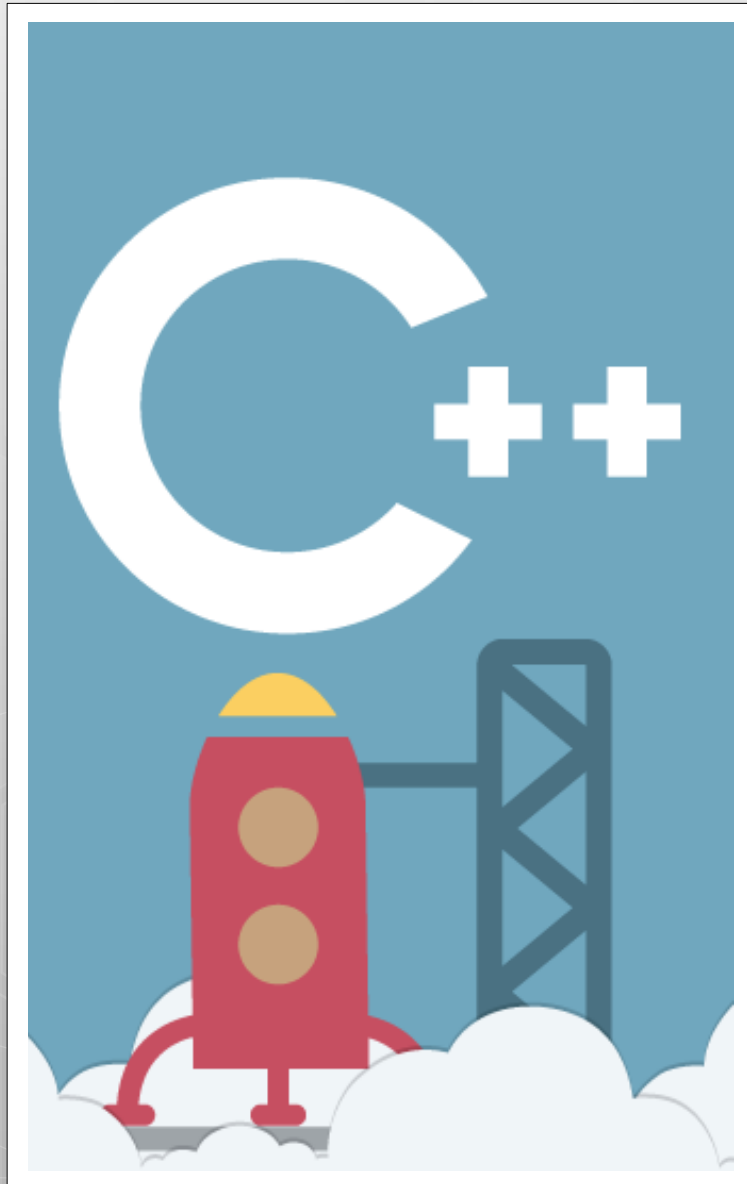

- Read a string from the user and calculates its length.
- Check if a given string is palindrome or not.

Time to try!

- Write a program to read lines from the input and print the longest line.
- Write a function to find substring of String
- Write a program to print all substrings of a given string

Time to try!

- Write a program to remove consecutive duplicates from a string.

Thank You!
